Palakkad, Kerala, India

EDUCATION

BSc in Computer Science from St Thomas College, Thrissur (University of Calicut)

Expected 2027

EXPERIENCE

AI Automation Engineer at SpeeHive, Palakkad, Kerala

July 2026 to Current

- Built an AI-powered Asana bot that retrieves repos, modifies code, and updates tasks automatically.
- Rewrote legacy .NET and Angular applications as modern Next.js apps, including an internal expense tracker.
- Integrated agentic AI workflows into daily development to ship features faster.
- Designed and built a scrolling storytelling website with a seamless user experience.
- Diagnosed and fixed database issues during QA, improving product stability.

Software Developer at Kerala State Development Corporation for SC/ST,

Thrissur, Kerala

November 2025 to January 2026

- Resolved database and migration issues for a government agency's .NET and MySQL systems.
- Fixed errors in an application migrating from a legacy system, keeping it running.
- Diagnosed and fixed migration-related database issues, restoring data accuracy.

PROJECTS

Linear AI Agent - Tool-Calling Bot (OpenAI, Cloudflare Workers)

- Built a tool-calling AI agent that operates inside Linear, answering queries with live data tools.
- Deployed the agent as a serverless Cloudflare Worker for zero-maintenance edge hosting.
- Integrated Linear AgentSession webhooks for native agent behavior in the workspace.

Office Pal - College Management System (Flutter, Supabase)

- Built a Flutter + Supabase college management system replacing paper-based administration.
- Designed an anti-cheat seating algorithm for 2000+ students with print-ready PDFs.

Stock Salt - Real-time Inventory & POS SaaS (Next.js, TypeScript, Supabase)

- Built a multi-outlet retail platform with POS terminals and live inventory tracking.
- Synced stock across terminals in real time with Supabase Realtime, preventing overselling.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Dart, SQL, Bash

AI & Automation: Tool Calling, MCP Servers, OpenAI API, AI Agents, n8n, Agentic Workflows

Frontend: React, Next.js, Flutter, Tailwind CSS, Three.js, Astro

Backend & Databases: Node.js, Supabase, PostgreSQL, MySQL, Microsoft SQL Server, PocketBase

Cloud & Infrastructure: Docker, Cloudflare Workers, GitHub Actions, Kubernetes (K3s), Tailscale, Linux, Git
